SAFETY ROLLUP

FALL: 4
HAT REMOVED: 2
IMPACT (likely set down): 2
NEAR FALL: 7
CRITICAL count: 4

Event 1: IMPACT (likely set down)

Severity: INFO Priority: low Confidence: low
Time: 2026-11-07T10:53:56.195-06:00
ID: 3ee6adbc-c224-45e2-a42b-b1d86d35d4ba
Peak 3.0 g | Gyro 164 dps | Freefall 5 ms | Tilt 1 deg | Still=True | Score=0.30
Worn before=True after=False | Set-down flag=True
Why:
- accel peak 3.0 g crossed the 3.0 g impact gate
- brief low-g dip (5 ms) ? not enough alone for free-fall
- motion settled afterward (still)
- worn signal went from worn ? not worn
- pattern matches hat set down on a surface (flagged, not discarded)
Verdict: Looks like the hat was placed down, not a body fall.
Action: Log as low priority; do not page as an emergency.
Story: At 2026-11-07T10:53:56.195-06:00, hat hat-01 recorded a IMPACT (likely set down) (priority=low, confidence=low, score=0.30). Peak accel 3.0 g, peak gyro 164 dps, free-fall 5 ms, tilt change 1°, still_after=True. Looks like the hat was placed down, not a body fall.

Event 2: NEAR FALL

Severity: INFO Priority: low Confidence: medium
Time: 2026-11-07T10:54:08.556-06:00
ID: 7f82dc92-05fd-45c6-bc1a-e47aa79c1759
Peak 7.8 g | Gyro 752 dps | Freefall 0 ms | Tilt 6 deg | Still=False | Score=0.46
Worn before=True after=True | Set-down flag=False
Why:
- accel peak 7.8 g crossed the 3.0 g impact gate
- high rotation (752 dps)
- motion continued afterward (not still)
Verdict: Impact-like spike but the wearer/board kept moving ? recovery or handling.
Action: Note as a near-miss / handling event; no emergency page.
Story: At 2026-11-07T10:54:08.556-06:00, hat hat-01 recorded a NEAR FALL (priority=low, confidence=medium, score=0.46). Peak accel 7.8 g, peak gyro 752 dps, free-fall 0 ms, tilt change 6°, still_after=False. Impact-like spike but the wearer/board kept moving ? recovery or handling.

Event 3: NEAR FALL

Severity: INFO Priority: low Confidence: medium

Time: 2026-11-07T10:54:17.041-06:00

ID: 9204ca3c-7394-4e4d-be50-15e31c3f921c

Peak 4.6 g | Gyro 468 dps | Freefall 0 ms | Tilt 75 deg | Still=False | Score=0.42

Worn before=True after=True | Set-down flag=False

Why:

- accel peak 4.6 g crossed the 3.0 g impact gate
- high rotation (468 dps)
- gravity direction shifted 75° (hat orientation changed a lot)
- motion continued afterward (not still)

Verdict: Impact-like spike but the wearer/board kept moving ? recovery or handling.

Action: Note as a near-miss / handling event; no emergency page.

Story: At 2026-11-07T10:54:17.041-06:00, hat hat-01 recorded a NEAR FALL (priority=low, confidence=medium, score=0.42). Peak accel 4.6 g, peak gyro 468 dps, free-fall 0 ms, tilt change 75°, still_after=False. Impact-like spike but the wearer/board kept moving ? recovery or handling.

Event 4: FALL

Severity: CRITICAL Priority: high Confidence: high

Time: 2026-11-07T10:54:27.290-06:00

ID: b49cdd90-1830-4d3f-835a-a43db2f24bb4

Peak 22.8 g | Gyro 717 dps | Freefall 10 ms | Tilt 58 deg | Still=True | Score=0.80

Worn before=True after=False | Set-down flag=False

Why:

- accel peak 22.8 g crossed the 3.0 g impact gate
- high rotation (717 dps)
- brief low-g dip (10 ms) ? not enough alone for free-fall
- moderate orientation change (58°)
- motion settled afterward (still)
- worn signal went from worn ? not worn

Verdict: Treat as a fall / hard impact requiring attention.

Action: Check on the wearer; include in the safety report as a high-priority incident.

Note: Accel saturated near –16 g ? true peak was at least this hard.

Note: Little/no free-fall; classified from impact size + rotation + stillness (tumbling-style).

Story: At 2026-11-07T10:54:27.290-06:00, hat hat-01 recorded a FALL (priority=high, confidence=high, score=0.80). Peak accel 22.8 g, peak gyro 717 dps, free-fall 10 ms, tilt change 58°, still_after=True. Treat as a fall / hard impact requiring attention.

Event 5: NEAR FALL

Severity: INFO Priority: low Confidence: low

Time: 2026-11-07T10:54:39.092-06:00

ID: eab64ddf-e17d-411e-b5f9-6cf76cbe28f0

Peak 6.2 g | Gyro 336 dps | Freefall 0 ms | Tilt 21 deg | Still=False | Score=0.38

Worn before=True after=True | Set-down flag=False

Why:

- accel peak 6.2 g crossed the 3.0 g impact gate

- high rotation (336 dps)
- moderate orientation change (21°)
- motion continued afterward (not still)

Verdict: Impact-like spike but the wearer/board kept moving ? recovery or handling.

Action: Note as a near-miss / handling event; no emergency page.

Story: At 2026-11-07T10:54:39.092-06:00, hat hat-01 recorded a NEAR FALL (priority=low, confidence=low, score=0.38). Peak accel 6.2 g, peak gyro 336 dps, free-fall 0 ms, tilt change 21°, still_after=False. Impact-like spike but the wearer/board kept moving ? recovery or handling.

Event 6: NEAR FALL

Severity: INFO Priority: low Confidence: medium

Time: 2026-11-07T11:06:15.216-06:00

ID: bf120ea9-bb24-422b-95fb-32ddb7b5f9c5

Peak 10.0 g | Gyro 765 dps | Freefall 10 ms | Tilt 19 deg | Still=False | Score=0.50

Worn before=True after=True | Set-down flag=False

Why:

- accel peak 10.0 g crossed the 3.0 g impact gate
- high rotation (765 dps)
- brief low-g dip (10 ms) ? not enough alone for free-fall
- motion continued afterward (not still)

Verdict: Impact-like spike but the wearer/board kept moving ? recovery or handling.

Action: Note as a near-miss / handling event; no emergency page.

Story: At 2026-11-07T11:06:15.216-06:00, hat hat-01 recorded a NEAR FALL (priority=low, confidence=medium, score=0.50). Peak accel 10.0 g, peak gyro 765 dps, free-fall 10 ms, tilt change 19°, still_after=False. Impact-like spike but the wearer/board kept moving ? recovery or handling.

Event 7: NEAR FALL

Severity: INFO Priority: low Confidence: medium

Time: 2026-11-07T11:06:25.536-06:00

ID: 5a205da8-a855-4e4b-b429-259e3e22a0fb

Peak 11.7 g | Gyro 618 dps | Freefall 0 ms | Tilt 14 deg | Still=False | Score=0.49

Worn before=True after=True | Set-down flag=False

Why:

- accel peak 11.7 g crossed the 3.0 g impact gate
- high rotation (618 dps)
- motion continued afterward (not still)

Verdict: Impact-like spike but the wearer/board kept moving ? recovery or handling.

Action: Note as a near-miss / handling event; no emergency page.

Story: At 2026-11-07T11:06:25.536-06:00, hat hat-01 recorded a NEAR FALL (priority=low, confidence=medium, score=0.49). Peak accel 11.7 g, peak gyro 618 dps, free-fall 0 ms, tilt change 14°, still_after=False. Impact-like spike but the wearer/board kept moving ? recovery or handling.

Event 8: NEAR FALL

Severity: INFO Priority: low Confidence: medium

Time: 2026-11-07T11:06:34.164-06:00

ID: cbb6e185-f052-4405-90fe-7487062b73ca

Peak 7.7 g | Gyro 661 dps | Freefall 0 ms | Tilt 59 deg | Still=False | Score=0.56

Worn before=True after=True | Set-down flag=False
Why:
- accel peak 7.7 g crossed the 3.0 g impact gate
- high rotation (661 dps)
- moderate orientation change (59°)
- motion continued afterward (not still)
Verdict: Impact-like spike but the wearer/board kept moving ? recovery or handling.
Action: Note as a near-miss / handling event; no emergency page.
Story: At 2026-11-07T11:06:34.164-06:00, hat hat-01 recorded a NEAR FALL (priority=low, confidence=medium, score=0.56). Peak accel 7.7 g, peak gyro 661 dps, free-fall 0 ms, tilt change 59°, still_after=False. Impact-like spike but the wearer/board kept moving ? recovery or handling.

Event 9: FALL

Severity: CRITICAL Priority: high Confidence: high
Time: 2026-11-07T11:06:45.789-06:00
ID: a3b4d2e5-75ec-4912-a5ba-c2673f4ad48f
Peak 16.4 g | Gyro 850 dps | Freefall 0 ms | Tilt 37 deg | Still=True | Score=0.75
Worn before=True after=False | Set-down flag=False
Why:
- accel peak 16.4 g crossed the 3.0 g impact gate
- high rotation (850 dps)
- moderate orientation change (37°)
- motion settled afterward (still)
- worn signal went from worn ? not worn
Verdict: Treat as a fall / hard impact requiring attention.
Action: Check on the wearer; include in the safety report as a high-priority incident.
Note: Accel saturated near –16 g ? true peak was at least this hard.
Note: Little/no free-fall; classified from impact size + rotation + stillness (tumbling-style).
Story: At 2026-11-07T11:06:45.789-06:00, hat hat-01 recorded a FALL (priority=high, confidence=high, score=0.75). Peak accel 16.4 g, peak gyro 850 dps, free-fall 0 ms, tilt change 37°, still_after=True. Treat as a fall / hard impact requiring attention.

Event 10: FALL

Severity: CRITICAL Priority: high Confidence: medium
Time: 2026-11-07T11:06:58.094-06:00
ID: 9f29dc89-8cdc-49c9-972a-cd38e4166729
Peak 4.8 g | Gyro 274 dps | Freefall 5 ms | Tilt 0 deg | Still=True | Score=0.45
Worn before=True after=False | Set-down flag=False
Why:
- accel peak 4.8 g crossed the 3.0 g impact gate
- brief low-g dip (5 ms) ? not enough alone for free-fall
- motion settled afterward (still)
- worn signal went from worn ? not worn
Verdict: Treat as a fall / hard impact requiring attention.
Action: Check on the wearer; include in the safety report as a high-priority incident.
Note: Little/no free-fall; classified from impact size + rotation + stillness (tumbling-style).
Story: At 2026-11-07T11:06:58.094-06:00, hat hat-01 recorded a FALL (priority=high,

confidence=medium, score=0.45). Peak accel 4.8 g, peak gyro 274 dps, free-fall 5 ms, tilt change 0°, still_after=True. Treat as a fall / hard impact requiring attention.

Event 11: HAT REMOVED

Severity: WARNING Priority: medium Confidence: high
Time: 2026-11-07T11:13:51.474-06:00
ID: 6d2becb0-4f63-48ac-83b0-8b533a0b2b1a
Peak 19.9 g | Gyro 742 dps | Freefall 0 ms | Tilt 90 deg | Still=True | Score=0.86
Worn before=True after=False | Set-down flag=False
Why:
- accel peak 19.9 g crossed the 3.0 g impact gate
- high rotation (742 dps)
- gravity direction shifted 90° (hat orientation changed a lot)
- motion settled afterward (still)
- worn signal went from worn ? not worn
Verdict: Hat was likely knocked off or removed (big tilt + then still).
Action: Confirm whether the worker is OK and whether PPE is back on.
Note: Accel saturated near –16 g ? true peak was at least this hard.
Story: At 2026-11-07T11:13:51.474-06:00, hat hat-01 recorded a HAT REMOVED (priority=medium, confidence=high, score=0.86). Peak accel 19.9 g, peak gyro 742 dps, free-fall 0 ms, tilt change 90°, still_after=True. Hat was likely knocked off or removed (big tilt + then still).

Event 12: NEAR FALL

Severity: INFO Priority: low Confidence: low
Time: 2026-11-07T11:14:08.052-06:00
ID: 046ffaab-62a4-4d1d-95c0-923b53272675
Peak 4.3 g | Gyro 211 dps | Freefall 0 ms | Tilt 18 deg | Still=False | Score=0.21
Worn before=True after=True | Set-down flag=False
Why:
- accel peak 4.3 g crossed the 3.0 g impact gate
- motion continued afterward (not still)
Verdict: Impact-like spike but the wearer/board kept moving ? recovery or handling.
Action: Note as a near-miss / handling event; no emergency page.
Story: At 2026-11-07T11:14:08.052-06:00, hat hat-01 recorded a NEAR FALL (priority=low, confidence=low, score=0.21). Peak accel 4.3 g, peak gyro 211 dps, free-fall 0 ms, tilt change 18°, still_after=False. Impact-like spike but the wearer/board kept moving ? recovery or handling.

Event 13: IMPACT (likely set down)

Severity: INFO Priority: low Confidence: low
Time: 2026-11-07T11:14:19.794-06:00
ID: d1998463-d169-42b5-9336-4c2e4cebb671
Peak 3.4 g | Gyro 232 dps | Freefall 5 ms | Tilt 1 deg | Still=True | Score=0.35
Worn before=True after=False | Set-down flag=True
Why:
- accel peak 3.4 g crossed the 3.0 g impact gate
- brief low-g dip (5 ms) ? not enough alone for free-fall
- motion settled afterward (still)

- worn signal went from worn ? not worn
- pattern matches hat set down on a surface (flagged, not discarded)

Verdict: Looks like the hat was placed down, not a body fall.

Action: Log as low priority; do not page as an emergency.

Story: At 2026-11-07T11:14:19.794-06:00, hat hat-01 recorded a IMPACT (likely set down) (priority=low, confidence=low, score=0.35). Peak accel 3.4 g, peak gyro 232 dps, free-fall 5 ms, tilt change 1°, still_after=True. Looks like the hat was placed down, not a body fall.

Event 14: FALL

Severity: CRITICAL Priority: high Confidence: high

Time: 2026-11-07T11:14:29.232-06:00

ID: ba068c7d-cca7-411a-bed7-cca335acb534

Peak 9.0 g | Gyro 500 dps | Freefall 0 ms | Tilt 44 deg | Still=True | Score=0.77

Worn before=True after=False | Set-down flag=False

Why:

- accel peak 9.0 g crossed the 3.0 g impact gate
- high rotation (500 dps)
- moderate orientation change (44°)
- motion settled afterward (still)
- worn signal went from worn ? not worn

Verdict: Treat as a fall / hard impact requiring attention.

Action: Check on the wearer; include in the safety report as a high-priority incident.

Note: Little/no free-fall; classified from impact size + rotation + stillness (tumbling-style).

Story: At 2026-11-07T11:14:29.232-06:00, hat hat-01 recorded a FALL (priority=high, confidence=high, score=0.77). Peak accel 9.0 g, peak gyro 500 dps, free-fall 0 ms, tilt change 44°, still_after=True. Treat as a fall / hard impact requiring attention.

Event 15: HAT REMOVED

Severity: WARNING Priority: medium Confidence: high

Time: 2026-11-07T11:14:52.534-06:00

ID: a02f0d4b-7f4f-421f-9181-8a18b56c4a01

Peak 10.6 g | Gyro 599 dps | Freefall 15 ms | Tilt 72 deg | Still=True | Score=0.83

Worn before=True after=False | Set-down flag=False

Why:

- accel peak 10.6 g crossed the 3.0 g impact gate
- high rotation (599 dps)
- brief low-g dip (15 ms) ? not enough alone for free-fall
- gravity direction shifted 72° (hat orientation changed a lot)
- motion settled afterward (still)
- worn signal went from worn ? not worn

Verdict: Hat was likely knocked off or removed (big tilt + then still).

Action: Confirm whether the worker is OK and whether PPE is back on.

Story: At 2026-11-07T11:14:52.534-06:00, hat hat-01 recorded a HAT REMOVED (priority=medium, confidence=high, score=0.83). Peak accel 10.6 g, peak gyro 599 dps, free-fall 15 ms, tilt change 72°, still_after=True. Hat was likely knocked off or removed (big tilt + then still).
